

## PSTLC04S Datasheet

### Ultra-Broadband, Cross-Over Interconnect Bridge

#### General Description

The PSTLC04S is a 4.0 x 4.0 x 1.0 mm single-path cross-over, interconnect bridge. It has superior performance of typical 0.1dB IL and better than 20dB return loss over a frequency range of DC–67GHz. The isolation is >40dB over the frequency range. These devices were designed for high-density, multi-channel receivers to manage line routing while helping to minimize the number of PCB layers.

#### Applications

- EW
- Test and Measurement
- Satellite Communications
- Telecommunications
- RADAR

#### Benefits

- Small Size
- Wide operational range: DC–67GHz
- Low loss, high isolation
- CTE matched to PCB substrates

**PCB Design Notes:**

1. Use blind vias (Layer 1 to Layer 2 pair) around RF traces.
2. Use solid ground pour on all ground pins of the part to prevent parasitic inductances.
3. If deviating from the above stackup, the recommended PCB footprint may need to be adjusted for tuning purposes. Please contact Nuvotronics for assistance with tuning.
4. Follow stenciling guidelines outlined in IPC-7525C to prevent over-pasting RF launches (see "PolyStrata SMT Assembly Guide" application note for details).
